Executive Summary

February 26, 2026 — March 5, 2026

Overview

During the reporting period of February 26, 2026 — March 5, 2026, the Security Operations Center monitored and analysed **7** security alerts across your infrastructure. The distribution shows **1** critical, **6** major, and **0** minor alerts.

26 agents are deployed across your infrastructure, with **1** currently active and **25** disconnected.

Security configuration assessment shows an overall compliance score of **35%** with **4911** failed checks requiring attention.

Key Recommendations

- ▶ Investigate and remediate the 1 critical alert(s) immediately. Critical alerts indicate a high probability of active threat activity or serious misconfiguration.
- ▶ Reconnect or retire 25 disconnected agent(s) to restore full visibility across the monitored infrastructure.
- ▶ Address 4911 failed CIS compliance check(s) to improve the security configuration baseline.
- ▶ Review the Top 10 alerts for recurring patterns; high-frequency recurring alerts may indicate persistent misconfigurations or active threat campaigns.
- ▶ Ensure all agents are running the latest version to benefit from the most recent detection rules and security patches.
